## **To the Family**

### **Ways to Make \$1**

*Sessions 3-4*

#### **Math Content**

Finding combinations of numbers that add up to 100

Counting by 5's and 10's

Exploring and adding multiples of 5 and 10

#### **Materials**

Student Sheet 20

Pencil

Nickels, dimes, and quarters; or you and your child could make small paper coins (optional)

In class, students have been working with 100. One way we have been exploring 100 is through the concept of money. For homework, your child will find as many possible coin combinations that equal \$1 as she or he can using nickels, dimes, and quarters.
