## The Second Edition of Investigations in Number, Data, and Space

## Pacing in Grade $3^{1}$

The third grade curriculum is organized into 9 units that offer from $2 \frac{1}{2}$ to 5 weeks of work, focused on the area(s) of mathematics identified in the unit's subtitle. Because units build on each other, both within and across strands, they are designed for use in the sequence shown.

| Unit Title | Number of Sessions |
| :--- | :---: |
| Trading Stickers, Combining Coins <br> Addition, Subtraction, and The Number System 1 | $\mathbf{1 7}$ |
| Surveys and Line Plots <br> Data | $\mathbf{2 0}$ |
| Collections and Travel Stories <br> Addition, Subtraction, and The Number System 2 | $\mathbf{2 6}$ |
| Perimeter, Angles, and Area <br> 2-D Geometry and Measurement | $\mathbf{1 7}$ |
| Equal Groups <br> Multiplication and Division | $\mathbf{2 3}$ |
| Stories, Tables, and Graphs <br> Patterns, Functions, and Change | $\mathbf{1 5}$ |
| Finding Fair Shares <br> Fractions | $\mathbf{1 4}$ |
| How Many Hundreds? How Many Miles? <br> Addition, Subtraction, and The Number System 3 | $\mathbf{1 9}$ |
| Solids and Boxes <br> 3-D Geometry and Measurement | $\mathbf{1 3}$ |

Note that the Investigations curriculum assumes that each school day includes 70-75 minutes of math: one hour on the day's Session, and 10-15 minutes on the Classroom Routine or TenMinute Math activity. Designed to fit within the calendar of a typical school year, third grade includes a total of 164 sessions (or approximately 33 weeks of work). This provides some leeway for going further with particular ideas and/or accommodating local circumstances. Although pacing will vary somewhat in response to variations in school calendars, needs of students, your school's years of experience with the curriculum, and other local factors, following the suggested pacing and sequence will ensure that students benefit from the way mathematical ideas are introduced, developed, and revisited across the year.
