

# More Challenging Story Problems

(page 1 of 2)

Solve the problem. Show your work.

Write an equation.

1. Our class had 22 animal books in our library.  
We loaned 17 of them to another class.  
How many animal books do we still have?

2. Franco had 40 pennies.  
He spent 29 pennies to buy a pencil.  
How much money does Franco have left?

# More Challenging Story Problems

(page 2 of 2)

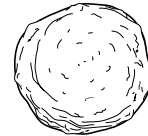

Solve the problem. Show your work.  
Write an equation.

- 3.** Kira and Jake made some snowballs.

They made 52 snowballs.

They used 13 snowballs during a snowball fight.

How many snowballs do they have left?

- 4.** Jake and Sally were collecting rocks.

Jake found 26 rocks and Sally found 14 rocks.

How many rocks did they collect?

- 5.** There were 52 students in the gym.

25 students went back to their classroom.

How many students were left in the gym?
