

Division Problems

Solve the following problems. Make sure anyone looking at your work can tell how you solved the problem.

1. Write a word problem for $21 \overline{)252}$ and solve it.
2. There are 415 biographies in the school library. If each shelf holds 27 books, how many shelves are completely filled? How many books are left?
3. Write a word problem for the equation $525 \div 21 = \underline{\hspace{2cm}}$. Then solve it.
4. There are 748 students eating lunch in the cafeteria at school. The same number of students is sitting at each of 22 tables. How many students are sitting at each table?
